

## AB Diagnostic Systems

Is it possible to reinvent the wheel  
for clinical diagnostics?  
For us there's only one answer: yes.

**AB Diagnostic Systems** was founded in 2010 to realize our idea of the ideal testing kit after working in the field for over 20 years. Our approach is to first look closely at how testing equipment is being used in clinical laboratories, blood banks and hospitals all around the world. And then adapt our products to this work routine.

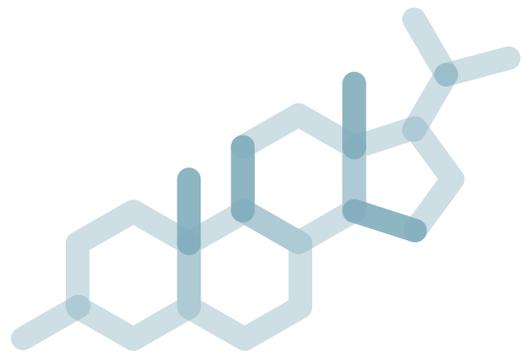

The goal of our reinvention is to enable laboratory staff to work more accurately and intuitively – and receive results in an **efficient, easy and better** way.

## Biotech from Germany

Over 30 employees are working in our headquarter in Adlershof, the birthplace for innovative start-ups in Berlin. Our 2000 m<sup>2</sup> production facility allows us to produce **up to one million plates a year**. The installed equipment enables us to achieve homogeneous batch sizes of up to 5000 plates.

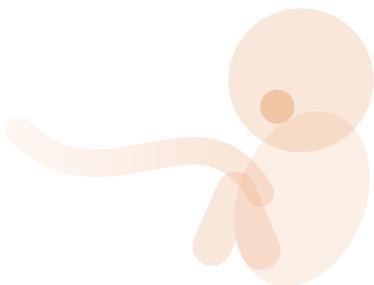

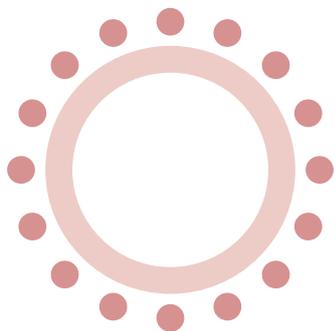

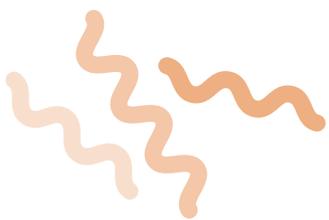

**Made in Germany** defines the promise we give to our clients in terms of precision, reliability and quality. Made in Berlin additionally stands for curiosity, constant improvement and the courage to creatively tackle the problems of our times.

abia<sup>®</sup>

efficient • easy • better

# Why you should use abia®

Our kits have been designed to improve the clinical testing work routine – and save you time, effort, money and refrigerator space. No other kit can compete with the workflow, overview and storability that abia provides.

## abia® is ...

### efficient

- ✓ The new box setup makes testing processes and sample organization much easier

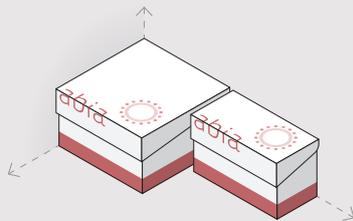

### easy

- ✓ The new packaging saves space during transportation and storage in your laboratory

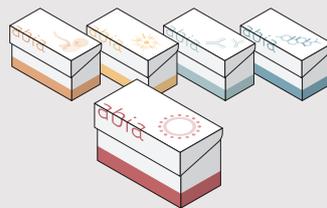

### better

- ✓ for you, the patients and the environment

## The innovative abia® box

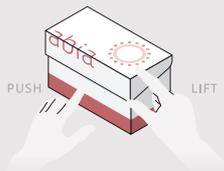

- 1 Compact dimension**  
Saves space in the fridge and on your table. XL boxes are only twice as big as S boxes

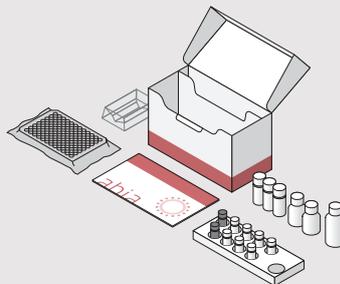

- 2 Color coding**  
Recognize product groups by their color

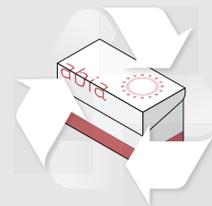

- 3 Convenient labeling**  
Important information can be read from two sides making storage more flexible and user friendly

- 4 Smart closure**  
Makes closing and reopening easier

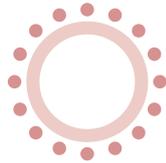

- 5 Thoughtful organization**  
Components are identically organized throughout all product groups making the handling more intuitive

- 6 Recyclable**  
Box is 100 % cardboard – less plastic waste

# The abia<sup>®</sup> product line

The world's easiest to use range of diagnostic kits for HIV, hepatitis B, C, E infections, COVID-19, prenatal diagnostics (TORCH), hormones, tumor markers and more. All tests are „Made in Germany“ in compliance with European standards and Directive 98/79/EC on in-vitro-diagnostic medical devices.
